

# Cyber Courses (An Initiative by)

Scholastic Seed Inc.

In the era of higher education in universe course is a unit of teaching that typically lasts one academic term, is led by one or more instructors (teachers or professors), and has a fixed roster of students. A course is usually an individual subject. A course officially is the collection of all courses (in the American sense, these are often called "modules") over a year or semester, though the American usage is common. In the Philippines, a course can be an individual subject (usually referred to by faculty and school officials) or the entire programme (usually referred to by students).

## Become an AI and Machine Learning Expert with India's No.1 AI Program

PG Program from The University of Texas at Austin\*

\*Applicable for PG Program in Artificial Intelligence and Machine Learning only.

India's Most Comprehensive Artificial Intelligence & Machine Learning Program

Learn Artificial Intelligence and Machine Learning with hands-on projects and learning support, all designed to help you become an expert.

- Python
- Deep Learning
- Computer Vision
- Machine Learning
- Neural Networks
- Natural Language Processing

12 Month Comprehensive Program  
12+ Hands On Projects  
International Recognition

Application Deadline  
**24th Jan 2020**
