Pristine InfoSolutions is a global IT services and Information Security company

Pristine InfoSolutions is a global IT services and Information Security company based in Mumbai, India embracing strong competencies in IT Outsourcing Services, Systems Integration, IT Infrastructure Management, IT Security and Audit Services, Cyber Crime Investigations, Cyber Law and the entire spectrum of IT Security training businesses. The organization is focused on delivering smart, next-generation business solutions that help enterprises across the world to overcome their business challenges.

Excelled with a unique business model, strong values and philosophy, combined with trained, certified and highly experienced workforce, we have established a reputation of providing top notch IT and Information Security services to industry leaders. We help organizations reduce risk and enhance competitive advantage by protecting their information assets and providing positive assurance on governance.

Pristine has been at the fore front of pioneering innovative IT solutions and services, enabling our clients to meet their business objectives. Our IT Outsourcing offerings aims to become the outsourced IT Department of the customer with an experienced team of technocrats thereby, maximizing ROI on IT Infrastructure. Pristine's System Integration Services include supply, installation and integration of hardware and software across India with complex IT implementation projects to ensure that all our clients always benefit from the latest cutting-edge technology.

Our wide range of IT infrastructure management services guarantees best fit operational plans for innate business needs coupled with enhanced service levels, effective response rates, round the clock availability, scalability and reliability. At Pristine, we ensure our client's IT infrastructure consistently runs at peak performance by continuous evaluation and implementing customized solution through our experience and knowledge.

One of the most defining differentiators of Pristine InfoSolutions is its training Institute division which is the most trusted and by far the largest source for information security training in India. Over the years we have trained more than 10000 individuals comprising of engineers, professionals, government departments and employees of corporate giants like Accenture, Wipro, Capgemini, Trend Micro, TCS, HCL and many others in different cities across the country and produced highly skilled pool of IT professionals to counter global industry challenges in the field of Information Security.

Why Pristine?

With impeccable expertise and technologies, Pristine InfoSolutions is committed to deliver the most competent IT services and solutions to serve its client needs and expectations worldwide.

Great Enterprise Contribution to Society

History of the NCSC

Launched in October 2016, the NCSC has headquarters in London and brought together expertise from CESG (the information assurance arm of GCHQ), the Centre for Cyber Assessment, CERT-UK, and the [Centre for Protection of National Infrastructure](#).

The NCSC provides a single point of contact for SMEs, larger organisations, government agencies, the general public and departments. We also work collaboratively with other law enforcement, defence, the UK's intelligence and security agencies and international partners.

Cylance

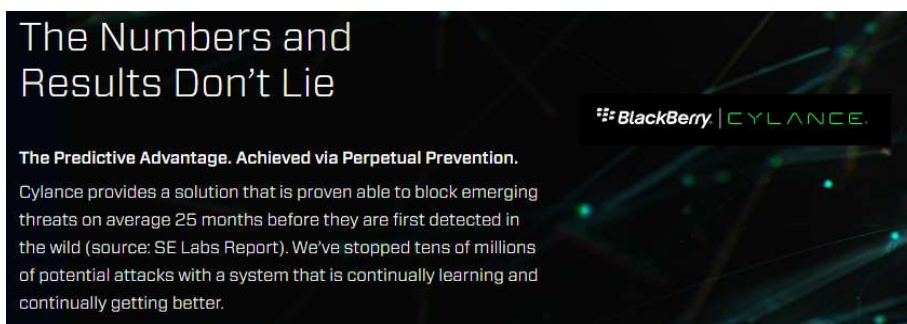

CYLANCE

<https://www.cylance.com>

Sporting the tagline “stopping tomorrow’s attacks today,” Cylance is the only unicorn (startup valued for at least \$1 billion) in this AI cybersecurity group. It was only **one of five of the AI 100** that had reached such a valuation as of January. To date, it has raised **\$177 million**, including a \$100 million Series D

mega-round last year, led by Blackstone Tactical Opportunities (not the same Blackstone that created super assassin Jason Bourne, we assume). Among its many other backers is Khosla Ventures, which has participated in four investment rounds so far, and is one of the top VC firms for AI startups

FAQ About The Company

Who bought Cylance?

BlackBerry to **buy** cybersecurity firm **Cylance** for \$1.4 billion. BlackBerry said on Friday it will acquire **Cylance**, an artificial intelligence and cybersecurity company, for \$1.4 billion in cash.

Is Cylance an antivirus?

Cylance. Cylance Inc. is a software firm that develops **antivirus** programs and other kinds of computer software that prevent, rather than reactively detect, viruses and malware. ... **Cylance** has been described as “the first company to apply artificial intelligence, algorithms, and machine learning to cyber security.”

How does Cylance protect work?

CylancePROTECT is an advanced threat **protection** solution that, unlike other traditional endpoint **protection** software, makes no use of malware signatures. Instead, it employs techniques such as machine learning and artificial intelligence, which allows the identification of malicious code based on its behavior.
