

Scholastic Seed Inc. Cybernomics A New Monthly Periodical

Research is a long-term territory with importunate and focused efforts lead to optimistic results. When research is done in the field of Cyber vis-à-vis its economics, it has a plentiful collide and connotation not only for the corporate world but also for academia. Fostering Cyber research and providing a platform to publish good quality research papers based on empirical or scholarly research work has been an incessant endeavor of CYBERNOMICS.

I truly honoured to have been selected as the founder Editor of the new monthly periodical Cybernomics. I also very proud to be working in tandem with an outstanding team of Associate Editors and members of the Editorial Board. The latter have been selected as a balanced global illustration of the guidance in our turf. This is an editorial team that is fully engaged and committed to the success of these outstanding periodicals.

In this new era of Cyber there are a number of changes that we would like to highlight to the periodical's readers, as we are self-assured such changes will plead to an extensive range of academic and information technology interests. First, our periodical is a debut edition that has been collectively designed by our leadership team that aims to represent the global network of our community from cyber society. We recognize the importance of ensuring that our initiatives in an academic format would represents the work and research being conducted in all regions of the world, and at the same time also highlights key issues critical to technocrats not only in developed countries but also in low-resource countries. Second, the periodical will feature original articles that showcase important issues related to cyber and burgeoning terms which revolves around it.

The response to our appeal to authors for contribution has been overwhelming. In spite of our preeminent efforts, due to an assessment of editorial board and the referee review board, some of the articles/papers could not be incorporated in the present debut issue, but this shall not put a ceiling on any of the authors to send their original articles, case studies, research reviews or empirical contributions for publication in our periodical.

As Editor, we recognize the value authors place on high-quality and unbiased peer review conducted in an appropriate manner. In totaling, we value the significance of rapid publication, and so to that end we have structured our editorial team to comprise Associate Editors, a Social Media Editor, and a Video Editor so we are capable to expedite the processing of submitted manuscripts. We have instructed all those involved with the periodical in an attempt to endow with the highest standard of manuscript review, editing, and publishing. We have implemented rigorous peer review criteria, and this will be reflected in the quality of published articles. We also want to persuade all those who are interested in being part of this energetic and enthusiastic team to contact us, as we will welcome your contribution. We invite colleagues working in related disciplines of cyber and Information technology as an appropriate medium for the publication of your own high-quality research.

Manuscript submissions are being accepted for future volume which will be in the regular format. Original articles can be submitted to the Editor (Word document, by email only, at scholastic.seed@gmail.com). Articles for columns should be arranged with the respective column editor. Cybernomics is a right platform for academicians, industry executives, researchers and students for sharing the views and the news of the management in terms of research papers, articles and case analysis, reviews etc.

We are firm about the ensuing issues of the periodical with regard to quality and coverage. We hope that within short time this periodical will make the academicians, industry executives, researchers and students to travel from the point of recognizing something to acknowledge the whole thing. We wish the periodicals for its effort and continuity of its tempo in the same direction in the days to come. Our sincere thanks to all the contributors for their support and interest. We once again request all academician and researchers to send their unpublished articles/papers for publication in our periodical to understand the economics of Cyber.
